

## What is frogpad™?

frogpad™ is a biological urinal screen that uses all-natural bacteria to eliminate uric acid crystal and mineral deposits that block urinals and drain lines.

frogpad™ urinal screens are a true drain line treatment for eliminating uric acid crystal and mineral deposits, blockages and odors without damaging chemicals.

before treatment

after treatment

## What are the benefits of using frogpad™?

- Environmentally Friendly
- Contains NO caustics or harsh chemicals
- Safe for use in all plumbing fixtures + lines
- No need to descale due to buildup
- Eliminates foul urinal odors at the source
- Ideal for all urinal types

## Where can frogpad™ be used?

- Care Homes
- Hospitality
- Public Sector
- Schools
- Hotels
- Airports

## How does frogpad™ work?

frogpad™ is liquid activated and placed above the drain in the urinal. When in contact with the liquid inside a urinal, the all-natural bacteria block inside the frogpad™ screen will dissolve providing the deodorizing properties controlling the odors.

frogpad™ is designed to offer an effective means of odor control by releasing enzymes during use to attack uric crystals inside urinal P-traps and lines, all while keeping the urinal drains free of blockage.

## Questions?

bluefrog Plumbing + Drain's considerate, professional service experts are highly trained and knowledgeable about plumbing systems. We'd love to answer any of your questions or evaluate your plumbing situation free of charge.
